

# POLE CAMERA INSPECTION SERVICES

OST Services now provides pole camera inspection services.

Pole camera inspections represent an excellent way to reduce inspection time and costs associated with remote and/or limited access locations. Prime examples involve pipe supports, restraints and snubbers in pipe racks along with cable trays, tanks and a multitude of other plant equipment. The pole camera arrangement will often eliminate the need and expense, of scaffolding and other means of temporary access and expedite activities. Results can be viewed in real time or digitally recorded in video, or still image form for documentation purposes.

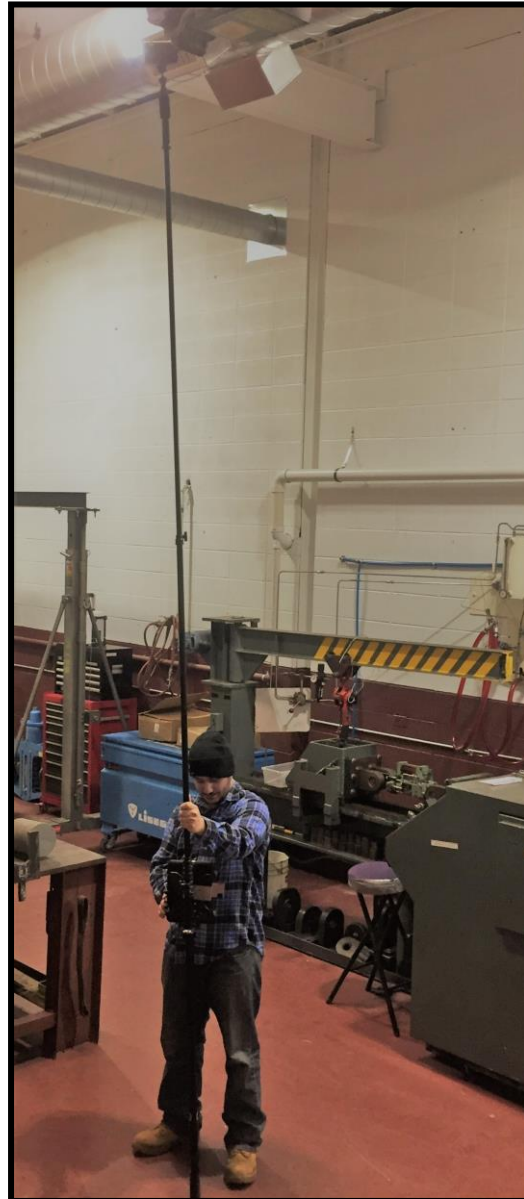

Our pole camera produces high quality photos with exceptional zoom in quality

## Overview:

- Pan & tilt camera head
- 30x zoom camera
- Extends to 21', retracts to 5'6"
