

# PIPE SUPPORT TRAINING

## PIPE SUPPORT SEMINARS

As a means to enhancing power plant reliability and safety, training seminars have been developed for specific areas of pipe support technology.

The seminars are designed to provide training based on the products installed, the equipment suspended, and the interests associated with each specific site. Some of the general topics discussed include:

- **DESIGN**
- **SAFETY**
- **INSPECTION**
- **ADJUSTMENT**
- **INSTALLATION**
