

# RADIOGRAPHIC PROFILING

## Attemperator Assemblies

While typically applied for the evaluation of weld quality, radiography also has useful applications when utilized as a profiling technique. One example involves the evaluation of components that are inaccessible, such as internals of desuperheater or attemperator assemblies

Ocean State Technical Services can provide on-or-off line inspections of these and similar power plant equipment.

- Detect cavitated areas
- Discover obstruction or debris collection
- Spray liner head/nozzle degeneration

Radiograph of Ruptured Spray Nozzle Assembly
