

UAV INSPECTION SERVICES

Ocean State Technical Services (OSTS) now provides UAV inspection services.

These inspections are particularly useful for remote locations where extensive access (scaffolding, etc.) would otherwise be required. Some examples include the following:

- Power Plant equipment and accessories
- Stacks (interior and exterior) & CEMS Equipment
- Cooling Towers
- Confined Space Inspections
- Bridges
- Structural components
- Roofs
- Tank Farms

Traditionally, these will be carried out with a combination of a crew, ropes, scaffolding and ladders. Not only is this a slow and costly process, the results are often of lesser quality. By utilizing our drone inspection services, the consumer is able to lower costs and improve safety. Drone inspections revolutionize the way the industry solves maintenance issues.

Our Pilots are all FAA Licensed and certified to OSTS procedures and standards.

Simply contact us at 401-467-8661 or toll free at **800-565-9729**.
